Weather Key Points

Regional Operations Center

Western Region

Sunday, September 11

- Scattered showers and thunderstorms will persist across the Sierra and southern California through Monday evening, persisting over along and east of the Sierra through early Wednesday. A few isolated storms are also possible across far northern California Sunday evening through Monday.
 - A few thunderstorms Sunday and Monday will be capable of producing locally heavy rainfall amounts of 1 to 2 inches, though most areas are not expected to receive significant rainfall
 - The burn scars of most concern on Sunday will be the Apple and El Dorado, as well as the ongoing Radford and Fairview Fires
- Fire weather conditions will remain elevated across much of northern California Sunday and Monday, with elevated conditions expanding back into much of southern California through mid and late week due to locally breezy winds and ongoing dry conditions in many areas
 - An uptick in winds is possible Tuesday and Wednesday and could bring some locally critical fire weather conditions, especially over northern California
 - Relative humidity values will increase through late week across much of the state
 - Thunderstorms over the northern Sierra and Modoc Plateau on Sunday could produce some dry lightning strikes
